Contents Vol. 141

Geochemical and tectono-magmatic evolution of the volcano-sedimentary rocks of Pechenga and other greenstone fragments within the Kola Greenstone Belt, Russia
P.K. Skuf'in and H.F.J. Theart 1

Protists of the Upper Mesoproterozoic Ruyang Group in Shanxi Province, China
Y. Leiming, Y. Xunlai, M. Fanwei and H. Jie 49

Age of felsic volcanism and the role of ancient continental crust in the evolution of the Neoarchean Rio das Velhas Greenstone belt (Quadrilátero Ferrífero, Brazil): U–Pb zircon dating of volcaniclastic graywackes
C.M. Noce, M. Zuccheti, O.F. Baltazar, R. Armstrong, E. Dantas, F.E. Renger and L.M. Lobato 67

The Gurupi Belt, northern Brazil: Lithostratigraphy, geochronology, and geodynamic evolution
E.L. Klein, C.A.V. Moura, R.S. Krymsky and W.L. Griffin 83

Provenance and tectonic development of the late Archaean Gawler Craton, Australia; U–Pb zircon, geochemical and Sm–Nd isotopic implications
G. Swain, A. Woodhouse, M. Hand, K. Barovich, M. Schwarz and C.M. Fanning 106

Ancient (Meso- to Paleoarchean) crust in the Rae Province, Canada: Evidence from Sm–Nd and U–Pb constraints
R.P. Hartlaub, T. Chacko, L.M. Heaman, R.A. Creaser, K.E. Ashton and A. Simonetti 137

Deep valley incision in the terminal Neoproterozoic (Ediacaran) Johnnie Formation, eastern California, USA: Tectonically or glacially driven?
M.E. Clapham and F.A. Corsetti 154
